PROFESSIONAL SUMMARY

Java Developer with hands-on experience in Java, Spring Boot, RESTful APIs, AWS, and DynamoDB. Experienced in developing and testing backend services, implementing API integrations, and working with cloud-based solutions. Hands-on experience with AWS Lambda, AWS CDK, serverless infrastructure migration, automated resource tagging, audit tracking, and cloud cost optimization.

EDUCATION

Oriental College Of Technology, Bhopal **2020-2024**

Bachelor Of Technology- Information Technology

CGPA: 8.68

TECHNICAL SKILLS

Programming: Java, JavaScript
Backend: Spring Boot, REST APIs
Cloud: AWS, Lambda, DynamoDB, S3, API Gateway, Athena, AWS CDK
Frontend: React.js, Redux
Tools: Git, GitHub, Bitbucket, Jira, IntelliJ, VS Code
Concepts: OOP, Data Structures & Algorithms

WORK EXPERIENCE

Tata Consultancy Services - Web Application Developer — Mar 2025 - Present

Gifting Data Web Service

- Developed RESTful APIs using Java and Spring Boot to create, retrieve, update, and delete gifting data.
- Implemented Amazon DynamoDB for storing and retrieving gifting data using efficient data access patterns.
- Integrated Operation Change History (OCH) to maintain an audit trail of data changes, including user and timestamp details.
- Worked on API specifications, request/response handling, validation, and downstream service integration.
- Performed API testing, deployment, regression testing, and troubleshooting across development environments.

AWS Lambda Tagging Automation

- Developed an automated tagging solution for AWS Lambda resources to support resource identification, governance, and cost tracking.
- Implemented a 3-step workflow — Identify, Tag, and Validate — to enforce required tagging standards.
- Identified untagged Lambda resources by validating resource metadata against defined tagging policies.
- Automated tag application and validation to improve tagging compliance and resource visibility.
- Enabled improved AWS Cost Explorer cost tracking by associating resources with tags such as department, project, and business unit.

AWS Infrastructure — CDK Migration

- Migrated serverless infrastructure from Serverless Framework (SLS) to AWS Cloud Development Kit (CDK).
- Converted YAML/JSON-based infrastructure configurations into reusable CDK constructs using Node.js/Python.
- Improved infrastructure maintainability and reusability through code-driven infrastructure provisioning.
- Supported modular infrastructure design and version-controlled management of cloud resources.

INTERNSHIP

The StackMentalist - Frontend developer(Intern) **Feb 2024 – July 2024**

- Developed responsive web interfaces using HTML, CSS, JavaScript, and React.js.
- Collaborated with designers and backend developers to implement and enhance web features.
- Used Git for version control, code collaboration, and issue tracking.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** **Mar 2026 – Mar 2029**
